

Moonbase Explorers Program Teacher Info

Welcome to the Moonbase Explorers Program! This hands-on STEM experience gives your students exposure to multiple science standards, as well as a chance to work cooperatively to explore science in a fun way.

The Moonbase Explorer Program lasts 2 hours. Your students will spend time in both our Apollo Moonbase Room and in our Planetarium. To make this an educational and enjoyable experience for all, plan to do the following:

- **Bring 5 adult chaperones PER GROUP of 24 students (class), not including the teacher(s), to act as the Mission Specialists. The success of the mission relies heavily on the Mission Specialists' guidance.**
 - *If your class is larger than 24 students, please bring 1 more adult chaperone than the required 5. Any group larger than 30 students requires the booking of a second program.*
- **Fill out the Moonbase Explorers Crew Manifest and have it ready when you arrive.**
- **Share the Mission Specialist information Sheet with your volunteers.**
- **Please arrive no earlier than 10 minutes prior to your scheduled Moonbase Explorers program time.**
- **Plan to have your students use the restroom before your scheduled start time. There will also be a restroom break halfway through the program as well.**
- **Please refrain from cell phone usage and text messaging during the program, as the students require assistance throughout the whole program.**

Thank you in advance for your preparation and participation in this program. We are looking forward to seeing you and your crew of young astronauts!
